Projects

Title: Service Order Life Cycle Management System

Role: Fullstack Developer

Date: June 2025 - September 2026

Description

Developed a full-stack event management web application using Next.js and PostgreSQL, enabling users to create, manage, and track events efficiently. Implemented responsive UI and backend APIs for seamless data handling. Deployed the application on Render, ensuring reliable performance and accessibility.

Deployed Project Link: [<https://service-order-lifecycle-management.onrender.com/>]

Title: Movie-Recommendation website

Role: Frontend Developer

Date: March 5 - 18, 2024

Description

participated in developing a movie recommendation website designed to suggest movies based on user preferences and viewing history. The project utilized user-friendly interface to provide personalized movie recommendations.

GitHub Repository Link: <https://github.com/yohannaanaa/Movie-Recommendation>

Deployed Project Link: <https://github.com/yohannaanaa/Movie-Recommendation>

Title: Tutoring website

Role: Frontend Developer

Date: March 2024 - April 2024

Description

Participated in developing an online tutoring platform designed to connect students with qualified tutors for various subjects. The project aimed to provide a user-friendly and efficient system for scheduling, conducting, and managing tutoring sessions.

GitHub Repository Link: <https://github.com/Yohanamtesfaye/Tutoring-Webiste>

Deployed Project Link: <https://abogida.vercel.app/>

Title: Facebook clone app

Title: Language Learning app

Role: Flutter Developer

Date: October 2025 - January 2025

Description

Developed Facebook clone app that resembles some part of Facebook app. Also as a course project I developed language learning app that help people learn language.
